1. Overview of Operating Results

(1) Overview of Operating Results

1) Overview of Fiscal 2017 (fiscal year ended March 31, 2018)

The global economy during the year ended March 31, 2018, remained on a modest rebound track primarily in developed countries. Steady economic growth continued in the United States maintained, backed by an improvement in the employment situation and an increase in individual consumption and capital expenditures. European economies, especially in the euro-zone, continued on a moderate recovery path due to an improvement in capital investment and productivity. The Chinese economy also showed some signs of strength due to the effects of the government's various economic measures, and economic growth in other emerging countries in Asia also remained on a recovery track. Amid these conditions, the Japanese economy recovered gradually as a result of the ongoing improvement in the employment and income environment and increased exports and capital investment supported by the steady recovery of the global economy.

Among the industries in which the Hitachi Metals Group (the "Group") operates, in the automobile industry, sales in Japan increased, led by strong demand for new models; and Europe and China also showed firm demand, while sales of new vehicles decreased in the United States compared with the year ended March 31, 2017. Demand for steel increased mainly in the manufacturing sector, including automobiles and industrial machinery. The number of new housing starts increased in the United States but was on a declining trend in Japan. In the electronics field, mobile device shipments increased.

Under the business circumstances described above, for the year ended March 31, 2018, the revenues of the Group increased by 8.5% to ¥988,303 million, compared with the year ended March 31, 2017. This result was affected mainly by a rise in raw materials prices (a sliding-scale raw materials pricing system) and the depreciation of the yen, in addition to an increase in demand for mainstays. Adjusted operating income* decreased by ¥853 million to ¥65,130 million, compared with the year ended March 31, 2017, mainly due to a rise in costs associated with a drop in profitability of heat-resistant exhaust casting components/ aluminum wheels and a rise in raw materials prices, despite an increase in income associated with increased revenue and the effects of cost reduction activities. Operating income decreased by ¥21,941 million to ¥46,326 million, compared with the year ended March 31, 2017, due to the recording of a gain on business reorganization and others as other revenue in the prior consolidated fiscal year, as well as the recording of impairment loss as other expenses during the year ended March 31, 2018. For the year ended March 31, 2018, income before income taxes decreased by ¥19,031 million to ¥46,985 million and net income attributable to shareholders of the parent company decreased by ¥8,383 million to ¥42,210 million, compared with the year ended March 31, 2017.

Results by business segment are as follows. Note that revenues for each segment include intersegment revenues. There were no changes to the businesses of the Group during the year ended March 31, 2018.

The Group has changed its segment names from "High-Grade Metal Products and Materials" to "Specialty Steel Products" and from "High-Grade Functional Components and Equipment" to "Functional Components and Equipment" effective from April 1, 2017. This change in segment names does not affect the segment information.

The Company has also changed the business segment of SH Copper Products Co., Ltd, a subsidiary of the Company, and one other subsidiary from the Wires, Cables, and Related Products segment to the Specialty Steel Products segment as of July 1, 2017, aiming to strengthen battery-related components in the Specialty Steel Products segment. Due to this change, the results of SH Copper Products, etc. for the year ended March 31, 2018, have been recorded under the Specialty Steel Products segment. In the following year-on-year comparisons, the figures for the year ended March 31, 2017 have been reclassified into the new segment classification. The results of SH Copper Products Co., Ltd, which became a consolidated subsidiary as of January 5, 2017, have been recorded since the fourth quarter of the year ended March 31, 2017 (January 1, 2017 through March 31, 2017).

Specialty Steel Products

Revenues in the Specialty Steel Products segment for the year ended March 31, 2018, were ¥290,599 million, an increase of 19.5%, and adjusted operating income increased by ¥4,328 million to ¥27,865 million, as compared with the year ended March 31, 2017. Operating income of the segment increased by ¥3,956 million to ¥26,127 million for the same period.

<Specialty Steel>

Sales of molds and tool steel exceeded those for the year ended March 31, 2017, due to a recovery in demand in both Japan and Asia. Sales of industrial equipment materials increased overall compared with those for the year ended March 31, 2017, as sales of environmentally friendly products related to automobiles as well as other industrial components, in particular, components for semiconductor-related equipment, increased. Sales of alloys for electronic products increased significantly

compared with the year ended March 31, 2017, due to strong sales of semiconductor package components in addition to increased sales of battery-related and organic EL panel-related components. Aircraft-related and energy-related materials sales were weak.

<Rolls>

In September 2016, the Group discontinued production of rolls at a Chinese subsidiary for the purpose of concentrating management resources on high value-added products. Meanwhile, sales of injection molding machine parts recovered resulting from an increase in demand for mobile devices. As a result, sales of rolls as a whole increased year on year.

<Soft Magnetic Materials and Applied Products>

Sales of soft magnetic materials and applied products as a whole fell below those for the year ended March 31, 2017, due to a drop in demand for amorphous metals, although sales of applied products for mobile devices and automobiles increased because of robust demand.

Magnetic Materials and Applications

Revenues in the Magnetic Materials and Applications segment for the year ended March 31, 2018, were ¥106,131 million, an increase of 6.4%, and adjusted operating income increased by ¥279 million to ¥9,593 million, as compared with the year ended March 31, 2017. Operating income of the segment decreased by ¥2,015 million to ¥7,286 million for the same period due to a rise in other expenses.

Sales of rare earth magnets overall exceeded those for the year ended March 31, 2017. The increase in sales is attributable to strong demand for automotive electronic components for electric power steering and hybrid automobiles and solid sales of industrial equipment, supported by increased demand for robots as well as capital investment-related demand for organic EL panels and semiconductors. Sales of ferrite magnets increased compared with the year ended March 31, 2017, due to strong demand for automotive electronic components, reflecting increased automobile production as well as robust demand for household appliance parts.

Functional Components and Equipment

Revenues in the Functional Components and Equipment segment for the year ended March 31, 2018, were ¥360,053 million, an increase of 8.0%, while adjusted operating income decreased by ¥5,654 million to ¥11,799 million due to a drop in the profitability of heat-resistant exhaust casting components and aluminum wheels, as compared with the year ended March 31, 2017. Operating income of the segment decreased by ¥15,313 million to ¥607 million for the same period on the back of a rise in other expenses due to the recording of an impairment loss relating to the aluminum wheel business.

<Casting Components for Automobiles>

Despite a slowdown in demand for casting components for pickup trucks and other light trucks as well as passenger vehicles in North America, sales of casting components for automobiles increased as a whole compared with the year ended March 31, 2017. This was due to an increase in demand for casting components for commercial vehicles, farming machinery, and construction machinery in North America, and increased demand for automobiles in Asia.

Revenues for heat-resistant exhaust casting components increased as compared with the prior year due to an increase in demand in the American, European, Asian and Japanese markets, but profits decreased for the same period due to productivity issues and other factors.

Sales of aluminum wheels fell below those for the year ended March 31, 2017, mainly affected by decreased demand for passenger vehicles in North America and productivity issues.

<Piping Components>

Sales of pipe fittings were robust due to an increased number of new housing starts in the United States, an increase in large construction projects in Japan, and strong performance in devices for semiconductor manufacturing equipment, reflecting an increase in demand for semiconductor-related equipment comparing to the period of the year ended March 31, 2017.

Wires, Cables, and Related Products

Due to the effects of a reorganization conducted for the purpose of renewing the Group's business portfolio, revenues in the Wires, Cables, and Related Products segment for the year ended March 31, 2018, were ¥230,532 million, a decrease of 1.0% while adjusted operating income increased by ¥266 million to ¥14,947 million, as compared with the year ended March 31, 2017, because of the expansion of the focused fields. Operating income for the segment decreased by ¥8,876 million to ¥11,183 million for the same period, due to the recording of a gain on business reorganization and others as other operating revenue in the prior year, as well as an increase in other expenses during the year ended March 31, 2018.

<Electric Wires and Cables>

Sales of wires and cables for rolling stock grew significantly, including growth in China. Sales of electric wires for

semiconductor manufacturing equipment and FA/robots increased, and magnet wires for automobiles and industrial machinery also posted higher sales.

<High Performance Components>

Demand for various sensors, harnesses for electric parking brakes and hybrid automobiles increased, and demand for brake hoses was also firm. Sales of probe cables for medical use increased over the prior year due to increased overseas demand.

Other

Revenues in the Other segment for the year ended March 31, 2018, were ¥3,417 million, an increase of 15.3%, and adjusted operating income decreased by ¥129 million to ¥124 million, as compared with the year ended March 31, 2017. Operating income of the segment decreased by ¥220 million to ¥111 million for the same period.

2) Outlook for Fiscal 2018 (the fiscal year ending March 31, 2019)

As for the Group's business environment, while the Group expects the world economy to continue on a recovery path, there are uncertainties stemming from political instability in many countries, concerns about further economic slowdown in emerging countries such as China, and sudden fluctuations in exchange rates and resource prices.

In this business environment, the Group aims to carry out its global growth strategies and build structures for sustainable growth based on the fiscal 2018 medium-term management plan to position itself as one of the world's leading high-performance materials companies. The consolidated operating forecasts for the fiscal year ending March 31, 2019, the third year of this medium-term management plan, are as follows:

Consolidated operating forecasts for the fiscal year ending March 31, 2019 (April 1, 2018— March 31, 2019)

(% indicates the rate of +/- compared with the same term of the previous fiscal year)

	Revenues		Adjusted Operating income		Income before Income Taxes		Net Income attribute to Shareholders of the Parent Company		Basic Earnings per Share

* In order to give a true view of the condition of the Company's business without the effects of business restructuring, adjusted operating income is presented as "operating income" in the table above, wherein said adjusted operating income is the operating income recorded in the consolidated statement of income, excluding non-operating income and expenses, and extraordinary income and losses. Adjusted operating income is a unified profit indicator for the Hitachi Group, including Hitachi, Ltd.

(2) Overview of Financial Condition

1) Assets, liabilities, and equity

The analysis of changes in the Group's consolidated statement of financial position as of the end of the fiscal year ended March 31, 2018, is as follows:

Total assets were ¥1,058,832 million, an increase of ¥18,442 million compared with the end of the fiscal year ended March 31, 2017. Current assets were ¥484,032 million, a decrease of ¥7,863 million compared with the end of the fiscal year ended March 31, 2017. This was mainly attributable to increases in trade receivables and inventories of ¥32,060 million and ¥36,646 million, respectively, and a decrease in cash and cash equivalents of ¥84,499 million. Non-current assets were ¥574,800 million, an increase of ¥26,305 million compared with the end of the fiscal year ended March 31, 2017. This was mainly attributable to increases in property, plant and equipment of ¥30,651 million and a decrease in goodwill and intangible assets of ¥9,299 million.

Total liabilities were ¥488,640 million, a decrease of ¥3,004 million compared with the end of the fiscal year ended March 31, 2017. This was mainly attributable to the net effect of decreases in the current portion of long-term debt and long-term debt of ¥34,515 million in total and deferred tax liabilities of ¥5,453 million and increases in trade payables of ¥22,209 million and other financial liabilities of ¥14,015 million. Total equity was ¥570,192 million, an increase of ¥21,446 million compared with the end of the fiscal year ended March 31, 2017. This was mainly attributable to an increase in retained earnings of ¥31,111 million.

2) Cash flows

Cash and cash equivalents as of March 31, 2018, were ¥54,912 million, a decrease of ¥84,499 million from March 31, 2017, as a result of net cash used in investing activities and financing activities exceeding the cash provided by operating activities.

The analysis of cash flows for each category as of March 31, 2018, is as follows:

<Cash Flows from Operating Activities>

Net cash provided by operating activities was ¥39,133 million. This was mainly attributable to net income of ¥42,075 million, and depreciation and amortization of ¥46,138 million despite payment of ¥48,343 million for the increase of working capital for inventories, among others.

<Cash Flows from Investing Activities>

Net cash used in investing activities was ¥75,080 million, which was mainly attributable to payment of ¥76,265 million for the purchase of property, plant and equipment.

<Cash Flows from Financing Activities>

Net cash used in financing activities was ¥47,562 million. This was mainly attributable to the repayment of long-term debt of ¥35,239 million and the payment of dividends of ¥11,294 million to shareholders.

In principle, the Company covers funding for growth investments with operating cash flows generated during the normal course of business and liquid funds. For other financing on a larger scale, Hitachi Metals implements reliable and flexible methods to minimize opportunity losses for its growth, including accessing financial and capital markets.

In the fiscal year ended March 31, 2018, the funds generated by an increase in earnings or changes in working capital were primarily allocated to capital expenditure aimed at strengthening the platform to achieve further growth.

During the fiscal year, the Company made certain repayments of long-term debt to ensure its funding stability. Hitachi Metals adopted a Group cash pooling system to help manage its own working capital and that of its subsidiaries. In principle, consolidated subsidiaries in Japan procure funds through this system, rather than taking on external debt. By consolidating surplus funds and debts across the Group, Hitachi Metals has better positioned itself to become more financially efficient. Group companies in the U.S. and China also use this cash pooling system, through which funds are centrally managed to enhance financial efficiency.

Ratio of equity attributable to shareholders of the parent company at market value: Total market value of stocks/total assets

Ratio of interest-bearing debts to cash flows: Interest-bearing debts/cash flows from operations

Interest coverage ratio: Cash flows from operations/interest paid

1. Each indicator is calculated using financial information per consolidated financial statements.
2. Total market value of stocks is calculated by multiplying the closing stock price at the fiscal year end by total number of stocks issued (excluding treasury stocks) as of the fiscal year end.
3. Cash flows from operating activities in the consolidated statements of cash flows are used as cash flows from operations in the above calculation. Interest-bearing debts include all interest-bearing debts recorded in the consolidated statement of financial position. Interest paid represents the amount of interest expenses paid per the consolidated statements of cash flows.

(3) Business Risks

The following are some of the business risks that may affect the performance and financial condition of the Group:

- a) Market trends in electronics, automobiles, construction, and other related industries in which the Group operates
- b) Economic fluctuations in the United States, Asia, Europe, and other regions where the Group sells its products
- c) Price changes in raw materials affected by international market conditions
- d) Effects of fluctuations in interest rates and credit risks associated with financing activities
- e) Impacts of changes in foreign exchange rates on transactions, assets, and debt denominated in foreign currencies
- f) Impairment losses arising from changes in fair value of investment securities held
- g) Disturbances due to economic, social, or political factors affecting overseas operations
- h) Decline in competitiveness and abilities to develop and commercialize new technologies or products
- i) Disputes over intellectual property rights
- j) Increase in costs associated with environmental, export control, or other regulation, or penalties for regulatory violations
- k) Costs related to product defects
- l) Impact of earthquakes or other major natural disasters on business activities
- m) Claims and lawsuits for damages due to unauthorized disclosure of personal and confidential information
- n) Estimates concerning retirement and service benefit
- o) Affects by a management strategy of the parent company
- p) Plan to reach M&A
- q) Difficulties to implement as the targeted benchmarks on the Medium-term Management Plan

The Group strives to avoid or minimize the impact of such risks by establishing and maintaining effective risk management systems. However, these risks may not be fully avoided or minimized, and may affect operating results, financial condition, and other aspects of the Group.

2. Basic Views of Selecting Accounting Standards

The Group has voluntarily adopted IFRS and prepared its consolidated financial statements under IFRS for the annual securities report beginning from the fiscal year ended March 31, 2015 (April 1, 2014 through March 31, 2015), for the purposes of further globalizing its business, better understanding of group management, stronger governance, and more efficient business operations.

(5) Notes to the Consolidated Financial Statements

[Segment Information]

The Group’s operating segments are components for which independent financial information is available and which are regularly reviewed by the Board of Directors to assist the Board in making decisions about resources to be allocated to the segments and to assess performance.

The Group has adopted a Company-based organization structure and established seven business headquarters based on the type of products and services. Each of the seven business units prepares a comprehensive strategy and engages in business activities related to their products and services for both the domestic and overseas markets.

Based on the above, the Specialty Steel Products segment comprises the Specialty Steel Business, Roll Business, and Soft Magnetic Materials Business. The Magnetic Materials are composed by Magnet Business. The Functional Components and Equipment segment comprises the Automotive Components Business and Piping Components Business. The Wire, Cables, and Related Products segment comprises the Electric Wires and Cables Business.

The Group has changed its segment names from “High-Grade Metal Products and Materials” to “Specialty Steel Products” and from “High-Grade Functional Components and Equipment” to “Functional Components and Equipment” effective from April 1, 2017. This change in segment names does not affect the segment information.

The primary products and services included in each segment are as follows:

Reportable segment	Major products and services
Specialty Steel Products	<ul style="list-style-type: none"> •YASUGI SPECIALTY STEEL brand high-grade specialty steel products (molds and tool steel, alloys for electronic products [display-related materials, semiconductor and other package materials, and battery-related materials], materials for industrial equipment [automobile related materials, and razor and blade materials] aircraft- and energy-related materials, and precision cast components) •Rolls for steel mills •Structural ceramic products •Injection molding machine parts •Steel-frame joints for construction •Soft magnetic materials (Metglas® amorphous metals; FINEMET® nanocrystalline magnetic material; and soft ferrite) and applied products
Magnetic Materials and Applications	<ul style="list-style-type: none"> •Magnets (NEOMAX® rare-earth magnets; ferrite magnets; and other magnets and applied products) •Ceramic components
Functional Components and Equipment	<ul style="list-style-type: none"> •Casting components for automobiles (HNM™ high-grade ductile cast iron products, cast iron products for transportation equipment, and HERCUNITE™ heat-resistant exhaust casting components) •SCUBA™ aluminum wheels and other aluminum components •Piping and infrastructure components (G™ Gourd brand pipe fittings, valves, stainless steel and plastic piping components, water cooling equipment, precision mass flow control devices, and sealed expansion tanks)
Wires, Cables, and Related Products	<ul style="list-style-type: none"> •Industrial cables, electronic wires, electric equipment materials, and industrial rubber products •Cable assemblies •Automotive electronic components and brake hoses

Income by reportable segment is based on operating income. Intersegment revenues are based on prevailing market price.
